## **MORE ADDED VALUE THROUGH PRODUCT CUSTOMIZATION**

The customization of products and services to achieve customer's satisfaction and deliver true added value though reliable, efficient and tailor-made solutions has always been Omera main goal.

To establish a dialogue with each single customer and respond to their specific requirements by customizing products and services on a one-to-one basis is the way **OMERA** operates.

Each request is analysed and studied in detail by a team of engineers and designers in order to find the most effective and reliable solution to customer's production needs.

With this in mind, Omera has recently designed and supplied a new concept of Beading Machine with horizontal geometry to flange and curl the edge of tubes in stainless steel.

The new **Horizontal Beading Machine mod. R400-I** with double head can work tubes of different length, from 300 to 2000 mm. The processing is performed on both ends of the tube at the same time.

*Fig. 1 – 2 Horizontal Trimming-Beading Machine R400-I for tubes 300 – 2000 mm length*

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
