LOSMA PRESENTS GALILEO EXTRA WITH X-VIEW SENSOR

LOSMA, leader in the design and construction of filtration systems for air and liquids for the mechanical and machine tools industry, presents its **range of air filters equipped with sensor: Galileo EXTRA and X-view.**

More filtration efficiency and more static pressure are the results of the Galileo EXTRA, the patented filtration system for mists, vapours and fumes generated by manufacturing applications. Available in **5 models** with flow rates from 245 to 2,750 m³/h, Galileo EXTRA technology combines **static and dynamic filtration** to ensure maximum efficiency. It is equipped with a turbine that aspirates oil mists and polluting particles in the air, which join together and return to the liquid state due to centrifugal force. Before being returned to the environment, the air passes through a new multilayer filter capable of retaining even the smallest particles.

Among the advantages of Galileo EXTRA there are also its **compact** dimensions and its very **low power consumption.**

Galileo EXTRA also ensures quick, **simple maintenance**: you only need to periodically replace the filters through the special lightweight, handy inspection cover.

Innovative design: Galileo EXTRA combines Italian design with the most modern technologies.

Galileo EXTRA can also be combined with the **clogging sensor X-View** (patent pending).

This new generation sensor indicates the **clogging status on the filters**, simply and immediately signalling when they need to be changed, thanks to its **LED light signalling system**. Thanks to its Self-learning function, it will automatically set its starting point to the flow, no matter which is the condition of installation.

X-View internal software can also detect if the air filter has immediate or progressive fluctuations in flow due to eventual piping obstruction or malfunctions.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
